About Us

Suspended In Time® is the latest method in floral preservation. This family based business began in 1997 and has spread from Utah throughout the United States. The original intention of the owner, MaryLee Bennett, was to provide in home businesses for mothers to earn an income and be home with their children. This dream has flourished to include over 40 businesses in several states.

This floral preservation method captures the spectacular beauty of your floral memories, and it does it in just days. Bridal flowers, funeral flowers, any occasion you celebrate with flowers can be preserved with stunning shape and color. This method surpasses any other type of drying system in life-like preservation, drying time, and, in most cases, cost to the customer.

While we offer a good selection of encasement products, if you are wanting something a little different or even custom, we can almost always get you what you want. We have access to so much more, if you can dream it, we will try our best to make it a reality.

We are excited for you to experience this amazing product framed in elegance and dazzling with original beauty. Thank you for choosing Suspended In Time.®
